

Graduation Report

Graduation Report analysis is the process of analysing and interpreting data on the earning potential of graduates from a particular college or university. The analysis typically includes data on the median income of graduates one year after graduation, five years after graduation, and ten years after graduation, as well as information on the average starting salary for graduates in different fields of study.

Benefits to the End User

- ✓ Graduation income reports can help colleges and universities And Management to Track high-achieving students who are looking for a college or university that will provide them with the best possible career opportunities after graduation.
- ✓ The report can also help Management to understand how their programs and services are impacting the Income of their graduates, and to make data-driven decisions about how to improve those outcomes in the future.
